

Planning, Problem Solving, Decision Making and Critical Thinking

Length
2 days

Price
\$1364.00 (inc GST)

Prerequisites

None

Overview

The ability to plan, think and be confident in decision making abilities is critical to the future of your organisation. Critical thinking has been rated as one of the most important skills anyone can contribute to their company.

Learn to be a stronger thinker and become wiser and more productive. You will draw conclusions more accurately and assess the impact of decisions in both the long and short term. Receive the best strategies, methods and training in these areas.

Skills Gained

- An effective model for problem solving
- The 8 crucial steps required when solving problems
- The essential elements of critical thinking
- Your thinking style and level of critical thinking skills
- Ways to improve your thinking
- How to utilise critical thinking in your day-to-day work

Key Topics

- The principles of planning
- The problem solving process
- Effective decision making
- The steps involved in critical thinking

Target Audience

Anyone interested in improving their planning skills and thinking abilities.
